WITS Changes – 18.25.6-18.29.1 Release Mental Health
12/22/2017

In the 18.25.6-18.29.1 release, multiple bugs were repaired in WITS. Below is a summary of the errors and the resolutions of the problems.

Issue	Resolution
Silverlight: Scheduler and GAIN short screener aren't working	Silverlight: Scheduler and GAIN Short Screener configuration issues are now resolved.
Client Profile: Errors for client with SSN of 000-00-0000	Client Profile: An SSN having zeros for all digits is now permitted.
Client Profile: Yellow screen error when creating new profile with existing client's name	Client Profile: A yellow screen no longer occurs when creating a new profile matching an existing client's name.
Group Session: Required to save when no changes were made	Group Session: The '...must save or cancel....' error no longer occurs when trying to leave the screen without making any changes, or when being returned to the screen after creating an encounter or miscellaneous note via the attendee list.
Referral: Cloning is not working properly while referring clients between child agencies with the same parent	ID - Referral: Cloning is now working properly while referring clients between child agencies with the same parent agency.
Session Timeouts: Yellow screen upon clicking to keep session active	Session Timeout: A yellow screen no longer occurs when clicking 'Keep Session Active' on the Session Timeout warning countdown.
Client Profile: Yellow Screen deleting Alternate Names in a specific scenario	Client Profile: A yellow screen no longer occurs upon deleting an Alternate Names record.
Dispensary: Script error upon clicking Patient Name dropdown	ID - Dispensary: A 'long-running script' error no longer occurs upon clicking within the Patient Name dropdown on the Dispensary Inventory Profile screen.
Reports: Yellow Screen Error when clicking 'On Screen' button for Pending Cases	ID - Reports: A yellow screen no longer occurs when clicking the "On Screen" button for Pending Cases.
ICANS: Issues with zip code lookup and assessment type	ICANS: When there is no assessment only assessment type available is "Initial" on Add Assessment modal. When Street, State and City are entered zip code search will populate the appropriate zip code.

ICANS: Unable to view client & have ICANS and WITS open at same time	ICANS: Clients with closed episodes will be displayed on the client list tile when the filter is removed. Staff member will not be able to log into both WITS and ICANS same time.
ICANS: Collateral contact requires address	ICANS: Address on collateral contacts is required only when city, state or postal code is entered. Street 1 and street 2 labels are relabeled to Address line 1 and Address line 2. Client relation type on collateral contact populates all the unexpired values from code table
ICANS: Error when opening Summary and Detailed Report in Training environment	Updated SSRS passwords for training and UAT.
Referral: Accepting a client - choosing yes to register that would create a duplicate UCN - causes error	ID - Referral: When accepting a Referred client that has same UCN in the current agency, system now throws an error message "This referral may not be accepted because a client with this Unique Client Number already exists in the agency."
ICANS: Age of First field: load 1 through 99 in the dropdown	ICANS: Age of First field: loaded values of 1 through 99 in the dropdown
ICANS: Unable to select Use in last 48 hours for more than 1 substance and Monthly cost and Use in past 48 hours missing from read only view	ID - ICANS: The Monthly Cost and the Use in Past 48 hours questions are now displayed when the Assessment is in read-only view. ID - ICANS: The Yes/No radio button for the Use in the last 48 hours question is now saved for each Substance individually.
ICANS Assessments: Wrong description for Sleep in Life Function Domain section	ID - ICANS: Question # 41 (Sleep) in the Life Functioning Domain section now displays the proper description.
ICANS: Reports not working in IE	ID - ICANS: Reports can now be run in IE.
ICANS: fix to CANS vocabulary version 1.0.1.	ID - ICANS: Special characters in the text of various questions of the Assessment will now be displayed properly.
ICANS: 'My Recent Assessment' text wrapping and client address fields mislabeled	ID - ICANS: Each value on the 'My Recent Assessment' tab is now positioned directly to the right of the corresponding check box. Also, relabeled address-related fields to 'Address Type', 'Address line 1', 'Address line 2', and ZIP Code'.
ICANS: Oversight read only user can edit record.	ID - ICANS: Client and assessments can no longer be created or edited for staff having the 'Access all oversight agencies in read-only mode' role.
ICANS: The "Help" link is pointing to WITS Portal instead of ICANS	ID - ICANS: The Help link URL now points to the ICANS portal.

ICANS: Make Narrative questions required (ID)	ID - ICANS: Narrative questions are now required for all domains.
ICANS: Change cd_access_category value from "Yes" to "YES"	ID - ICANS: The Access Category code table value has been changed to an all caps "YES".
ICANS: Diagnosis dropdown values do not contain icd_codes (ID)	ID - ICANS: Diagnosis dropdowns now display, and can be searched by, ICD-10 codes. Previously this was only the case for descriptions.
ICANS: Prompt does not display if a user adds an ICANS Assessment when there is already an existing "In Progress" assessment	ID - ICANS: The following prompt will be displayed with Yes/No options when trying to create a new assessment when there is an existing assessment with "In Progress" status: "An 'In Progress' CANS already exists. Creating a new one will set the current 'In Progress' CANS to 'Closed (Incomplete)'. Are you sure you want to create a new CANS?".
ICANS Dashboard: Multiple Window warning message is displayed when clicking on Episode History link (ICANS)	ID - ICANS: Hid the Episode History button in the Snapshot window.
ICANS: Assessment within Snapshot displays the blue WITS Navigation Menu button in the upper left	ID - ICANS: Hid the Menu Navigation button and menu on the CANS Assessment snapshot window.
ICANS: Assessment editable in Closed episodes & Environment missing in header	ID - ICANS: 'In Progress' assessments will be read only for closed episodes. Also, the environment is now displayed in the header.
ICANS: Unable to view or edit 'In Progress' Assessment when "Substance Use" is removed (ID)	ID - ICANS: 'In Progress' assessment with Substance Use can now be viewed or edited.
ICANS Assessment: Used Substance is not showing on PDF report	ID - ICANS: Detailed Summary Report now includes the Substance Use responses in the Substance Abuse Domain section.
ICANS: Snapshot link opens another ICANS site rather than a read-only window snapshot of the current screen	ID - ICANS: The Snapshot link now opens a read-only version of the current screen in a new browser window.
ICANS: Assessor ID column does not display on the Client Tile	ID - ICANS: The 'Assessor ID' column is now re-named as 'CANS User ID Number', and can now be displayed on the Client tile from the 'Select Columns' checkboxes. Also, this column will now display the CANS User ID Number of the staff who administered the most recent complete CANS Assessment for the client.
ICANS: 'Add CANS' button visible to users without Clinical (Full Access) or CANS Assessment (Full Access) role	ID - ICANS: The 'Add CANS' button on the dashboard is no longer visible for staff that do not have either the

	CANS Assessment (Full Access) or Clinical (Full Access) roles.
ICANS: Client Profile- Unable to edit "Date of Birth" and "SSN"	ID - ICANS: The 'Date of Birth' and 'SSN' fields are now editable from the Client Workspace.
ICANS: 'Client Permanent' is missing from address type drop down in Client Profile	ID - ICANS: Added "Client Permanent" as an available selection in the Address Type dropdown on Client Profile.
ICANS Assessment: History button does not show any history	ID - ICANS: The History button on the CANS Assessment screen now displays all history of that assessment (i.e any changes to any of the fields).
ICANS: Staff without a facility assignment cannot create a Client	ID - ICANS: A context facility must be selected to navigate to Client Dashboard.
ICANS: State Dropdown shows items not from State Code Table	ID - ICANS: All values in the 'State' dropdown field on the address panel are now pulled from the State table.
ICANS: Episode can be reopened and an episode can be added without the Intake role	ID - ICANS: An episode can no longer be re-opened, and Staff without the Intake (Full Access) role can no longer add a new episode.
ICAN issues- #9 USPS lookup not functioning when adding a new client or editing the address for existing client	ID - ICANS: USPS lookup now functioning when adding a new client or editing the address for existing client.
ICANS Assessments: Wrong description for Sleep in Life Function Domain section	ID - ICANS: Question # 41 (Sleep) in the Life Functioning Domain section now displays the proper description.
ICANS: Reports not working in IE	ID - ICANS: Reports can now be run in IE.
ICANS: Phase 2: Build the Medicaid Eligibility Version of the CANS Assessment (ID)	ID - ICANS: A new version of the assessment, CANS-50, is now implemented.
ICANS: Phase 2: Build Caseload/Dashboard view for Providers (ID)	ID - ICANS: Caseload Summary, Caseload by Recommended Level of Care and Caseload by CMH Assessments Due tiles are implemented.
ICANS: Phase 2: Update ToolTips for Add Buttons on CANS Portal Tiles (ID)	ID - ICANS: ToolTips for Add buttons now include the name of the record being added.
ICANS: Portal still shows WITS in URL and browser Tab	ID - ICANS: All references to WITS no longer appear in URLs, browser tabs, staff account-related screens (reset credentials, login, session timeout, etc.), or system-generated emails.
ICANS: Users without "View Idaho CANS Portal" role in WITS get red ribbon when they login	ID - ICANS: Users without the "View Idaho CANS Portal" role in WITS will receive the message "You do not have permission to access this screen or perform this action. To continue please go to the home screen." upon logging in to the ICANS portal.

ICANS: Phase 2: Modify duplicate client check in CANS to only display YES clients (ID)	ID - ICANS: Duplicate client check in ICANS now filters by Access Category such that only clients with Access Category = 'YES' are displayed as potential duplicates.
ICANS Assessment: Sign and Finalize button is available when the assessment is in read-only mode	ID - ICANS Assessment: Sign and Finalize button is no longer available when the assessment is in read-only mode.
ICANS: Dropdowns are sorted reversely by the Sort Order	ID - ICANS: Dropdowns are sorted by the sort order when specified and alphabetically when no sort order is specified.
ICANS: Ratings Definition texts do not wrap up properly	ID - ICANS: Ratings Definition text spacing added so it lines up properly with the numeric rating.
ICANS: Multiple issues with Emails and Screen headers	ICANS: Multiple issues with Emails and Screen headers
Intake: Agencies with only CMH Tx domain requires the field 'Past IV Drug Use' and causes an error in ICANS portal (ID)	ID - Intake: The Past IV Drug Use field is no longer state reporting required for agencies with only the Children's Mental Health domain.
ICANS: Client Contact Information should allow multiple addresses with the type of "Client Previous"	ID - ICANS: Multiple Client Previous addresses can be added in the Client Workspace.
ICANS: Cannot scroll down the Tile because toggle changes to double arrows	ID - ICANS: The double arrow mouse over for horizontally resizing tiles no longer appears when trying to scroll vertically on tiles that are not maximized. (Note - Tiles that are not maximized can now only be resized from the bottom corners).

Below you will find a summary of the change to WITS for the 18.29.1 release (which took place 12/26/2017. When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 18.29.1.

- The layout of the Encounter note screen will be changing, the program field will now be above the service field on the Encounter Note screen.

- Under the Client Profile, the Other Number page now includes the type of Medicare. Other Numbers are not required, adding the value of Medicare allows user (DBH) to track Medicare numbers and eligibility dates outside of the Client Group Enrollment.
